High Performing Systems

- *Focus on the future, not the present*
- *Believe that every student can learn*
- *Focus on new skills: creativity, critical thinking, collaboration*
- *Get and keep great teachers, via their development*

“In a world where the kind of things that are easy to teach and test have become easy to digitise and automate, it will be imagination and a sense of responsibility to shape the world for the better that become important. Tomorrow’s schools help students think for themselves and join others with empathy in work and in citizenship.”

*Andreas Schleicher,
Director for the Directorate of Education & Skills, OECD*
